

The Bridge Camera and The Race Assistant system

28th May 2025

The video camera

When you're running a race things can sometimes go wrong – perhaps you'll miss someone coming through the line. Having the camera properly trained on the start and finish lines means it won't be a disaster. All footage is automatically kept for around two weeks so the correct results can be retrieved.

It's important to ensure you can see – and read - the sail number of any boat that crosses the line. Something like this works well:

Switch on the video monitor to the right of the bridge window to see the picture that's being captured.

Instructions for controlling the camera are printed on a laminated A4 sheet on the bridge.

The Race Assistant system

The Race Assistant system will help you to:

- Collect sign-ons for the race
- Schedule the starting sequence
- Raise and lower the right flags at the right time
- Time boats as they come through the line on each lap
- Keep track of how long the race has been going

Once the racing is over it will:

- Work out the handicap results
- Print a copy for you to pin on the board in the lobby
- email a copy to the Admin Office for inclusion in the series results
- Produce a file for the RYA as input to next year's PY numbers

Startup

The system is designed to be as intuitive as possible, and provides basic on-screen instructions where appropriate.

Power up the computer when you arrive, and double-click the Excel icon in the centre of the screen :

Follow the on-screen instructions, and give the system time to respond.

The Sign-on sheet

The Sign-On sheet should get populated automatically from SailEvent. You can also edit it manually – just like a spreadsheet. All your edits will be preserved, and will be unaffected when you check for new sign-ons from SailEvent – which you should do regularly until 15 mins before the scheduled start.

[illegible]

Click here to
check
SailEvent for
new sign-ons.

Click here to go to the Starting Sequence screen

Editing a sign-on

In our example there's only one entry in the Asymmetric fleet, so we'll use the drop-down menu to put them in with the Dinghy Handicap.

Class		Fleet	Headcount	
216	RS 800	Asymmetric and Fast Handicap	2	Richa
235	EUROPE	Cadet	1	Louis
342	EUROPE	Catamaran Handicap	1	Finlay
430	EUROPE	Asymmetric and Fast Handicap	1	Jason
175	HADRON H2	ILCA	1	Peter
16	OK	Dinghy Handicap	1	Hugh
357	ILCA 6	ILCA	1	Peter
265	ILCA 7	ILCA	1	Malco

Clicking on the Fleet cell opens up a drop-down menu with a list of all fleets.

If you need to add a boat, there's a similar drop-down for Classes; just start typing to narrow down the options!

All your edits will be preserved, and will remain unaffected when you check for new sign-ons from SailEvent – which you should do regularly until 15 mins before the scheduled start.

Setting up the Starting Sequence

The Starting Sequence screen is where you select the fleets you will be starting. If the Race Assistant spots something that looks wrong it will prompt you to check.

Follow the red on-screen instructions.

1. Use toggle buttons to select the fleets you want to start

Cat

Cadet

Asymmetric

ILCA

Dinghy

Start	Offset
Warning signal	00:00:00
ILCA	00:00:25
Dinghy Handicap	00:00:45

2. After selecting the fleets you want to start, click here to perform final checks and preparations.

(This button does NOT trigger the start sequence)

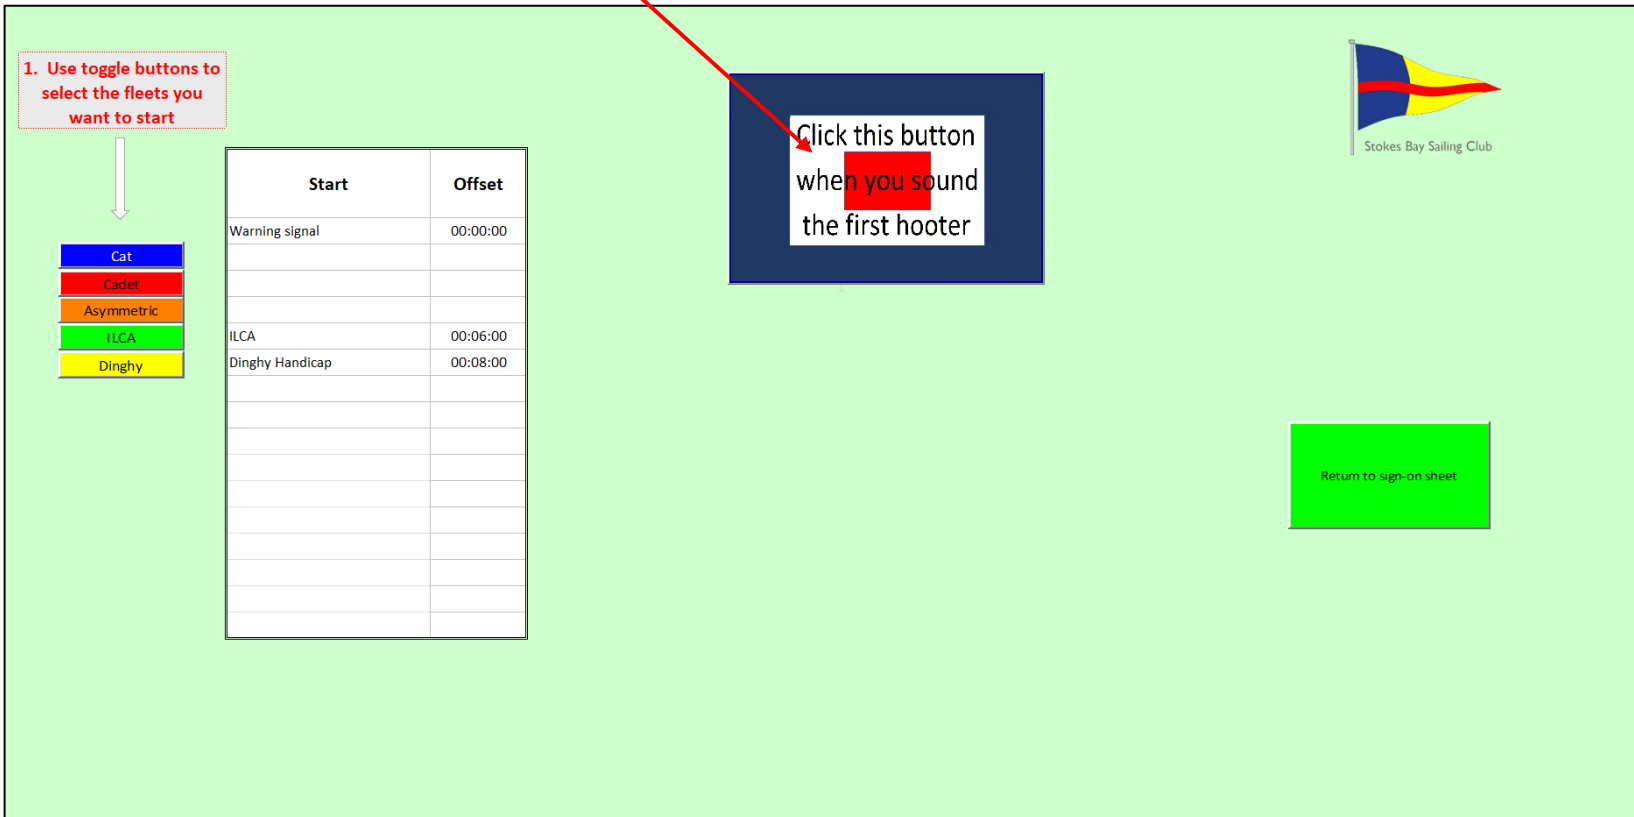

Stokes Bay Sailing Club

Return to sign-on sheet

Starting the race

When you've confirmed you're ready to go, you'll be presented with a 'Warning Flag' button.

There are three things to do at once here: 1. Get your ARO, outside, to hoist the warning flag
2. Sound the horn 3. Click this button (Tip: it's easier if you click the button first, and sound the horn a split second later).

The screenshot shows a race starting interface with a light green background. On the left, a red-bordered box contains the text "1. Use toggle buttons to select the fleets you want to start" with a white arrow pointing down to a vertical stack of five colored buttons: "Cat" (blue), "Cadet" (red), "Asymmetric" (orange), "ILCA" (green), and "Dinghy" (yellow). In the center, a table with two columns, "Start" and "Offset", contains the following data:

Start	Offset
Warning signal	00:00:00
ILCA	00:06:00
Dinghy Handicap	00:08:00

To the right of the table, a dark blue box contains the text "Click this button when you sound the first hooter" with a red arrow pointing to a red square button. In the top right corner, there is a logo for "Stokes Bay Sailing Club" featuring a blue and yellow pennant. In the bottom right corner, there is a green button labeled "Return to sign-on sheet".

Having done that you can relax for a few minutes while the system counts down. Watch the screen for what to do and when.

Clocking boats through the line

Once the start sequence is complete you'll be taken to this screen, where you can record each boat as it crosses the line.

Clicking the Sail # will record the lap time in the appropriate column, and the Sail # cell will change colour.

Tip: Provided it's not their last lap, the exact timing for a boat is not important – you just need to record that they've done the lap.

Click the sail number as each boat crosses the line

Sort by next arrival time

Sort by Fleet

TIDY UP: mark next selected boat as DNC, RTD, FINISHED, etc.

Finalise these results

RS 800	1216	Richard Clampett	18:21:34	
ILCA 6	172357	Peter Davison		
ILCA 7	214265	Malcolm Courts		

We've now covered all the core tasks. So let's look at a few ways you can make things easier for yourself as you go through the race...

Applying finish codes

The TIDY UP function allows you to mark a boat as being no longer in the race. In this case we are going to mark the ILCA 6 as having been OCS.

We select OCS from the drop-down menu, then click the Sail # of the boat:

The screenshot shows the racing software interface. A callout box highlights the 'TIDY UP: mark next selected boat as DNC, RTD, FINISHED, etc.' button. A dropdown menu is open, showing options: FINISHED, DNC, DNS, OCS, RTD, NSC, and DSQ. A mouse cursor is pointing at 'OCS'. The 'Time of warning signal' is 17:23:32. The table below shows the race results for various boats, including ILCA 6 and ILCA 7.

Fleet	Class	Sail #	Helm name	Lap 1 Time	Lap 2 Time	Lap 3 Time	Lap 4 Time	Lap 5 Time	Lap 6 Time	Elapsed time	Corr time	Place	PY	
Dinghy Handicap	EUROPE	235	Louise Belben	18:35:07						01:03:35	3346	3346	2	1140
Dinghy Handicap	EUROPE	342	Finlay Lloyd	18:35:09						01:03:37	3348	3348	3	1140
Dinghy Handicap	EUROPE	430	Jason Belben	18:35:03						01:03:31	3343	3343	1	1140
Dinghy Handicap	HADRON H2	175	Peter Varley	18:35:14						01:03:42	3657	3657	5	1045
Dinghy Handicap	OK	16	Hugh Myers	18:35:13						01:03:41	3489	3489	4	1095
Dinghy Handicap	RS 800	1216	Richard Clampett	18:21:34						00:50:02	3757	3757	6	799
ILCA	ILCA 6	172357	Peter Davison											1154
ILCA	ILCA 7	214265	Malcolm Courts	18:35:20						01:05:48	3576	3576	1	1104

The Sail # turns grey, and the boat's result is shown as OCS:

The screenshot shows the racing software interface after the boat ILCA 6 has been marked as OCS. The 'Sail #' for ILCA 6 (172357) is now greyed out. The 'OCS' result is shown in the 'Place' column. A red circle highlights the 'OCS' result in the table.

Fleet	Class	Sail #	Helm name	Lap 1 Time	Lap 2 Time	Lap 3 Time	Lap 4 Time	Lap 5 Time	Lap 6 Time	Elapsed time	Corr time	Place	PY	
Dinghy Handicap	EUROPE	235	Louise Belben	18:35:07						01:03:35	3346	3346	2	1140
Dinghy Handicap	EUROPE	342	Finlay Lloyd	18:35:09						01:03:37	3348	3348	3	1140
Dinghy Handicap	EUROPE	430	Jason Belben	18:35:03						01:03:31	3343	3343	1	1140
Dinghy Handicap	HADRON H2	175	Peter Varley	18:35:14						01:03:42	3657	3657	5	1045
Dinghy Handicap	OK	16	Hugh Myers	18:35:13						01:03:41	3489	3489	4	1095
Dinghy Handicap	RS 800	1216	Richard Clampett	18:21:34						00:50:02	3757	3757	6	799
ILCA	ILCA 6	172357	Peter Davison									OCS		1154
ILCA	ILCA 7	214265	Malcolm Courts	18:35:20						01:05:48	3576	3576	1	1104

Tip: If a boat has transgressed it's essential to give them an appropriate finish code. Applying it as soon as possible helps you to keep your screen tidy (see following pages).

Sorting the list of boats

‘Sort by next arrival time’ does what the name suggests

Click the sail number as each boat crosses the line

Using this button is entirely optional, but it can help when there are a lot of competitors, as it saves you searching right down the screen.

You can sort the boats at any time, and as often as you like.

Clicking ‘Sort by Fleet’ restores the original order.

Shortening course (finishing the race) - 1

Like the previous button, this one is optional. However if you are shortening course for everyone*, clicking the 'Shorten Course' flag will help you keep track of who has finished.

Click the sail number as each boat crosses the line

Click '?' for help info

Sort by next arrival time

Sort by Fleet

TIDY UP: mark next selected boat as DNC, RTD, FINISHED, etc.

QUICK UNDO:
To undo the last lap time entered, click the grey bar

To edit or delete any lap time:
Select it, then click the red bar

In this example we'll shorten them after two laps (so they finish on the third). The screen has just been sorted again by next arrival time, and the ILCA 7 clearly had a good second lap!

See the next page for what happens after clicking the 'Shorten Course' flag.

* Results are always calculated using average lap times, so you can shorten course at any time, and it does not matter if boats in the same fleet don't all do the same number of laps.

Shortening course (finishing the race) - 2

Four boats have now finished and, because the Shorten Course button had been clicked, their Sail Numbers have turned grey to indicate they are no longer racing:

Click the sail number as each boat crosses the line

Sort by next arrival time ? Sort by Fleet

TIDY UP: mark next selected boat as DNC, RTD, FINISHED, etc. ?

Select it, then click the red bar

You will be asked to enter your name, and to add any comments that might be useful to the competitors or the Admin Office. For example: "ILCA 234567 was disqualified for sailing inside the 50m mark" or "Sail # 123 was actually 234, but used a different sail tonight".

Summary

- Make sure the video is trained on the start / finish line and is correctly zoomed in
- Start the Race Assistant system and collect entries from SailEvent
- Edit sign-ons as appropriate, and manually add / delete competitors if needed
- Set up and run the starting sequence
- Clock boats through the line
- Apply finish codes as soon as you can, and consider sorting the screen frequently to keep the boats you're interested in near the top of the list.
- Provided you're shortening all fleets, use the Shorten Course button to keep track of finishers.
